

# Local Community Networks - Enhanced Highway Maintenance

# Introduction

- Creation of a single unitary Council for Somerset was approved in July 2020
- Local Community Networks (LCNs) created to promote active community decision making and inspire local place-shaping
- Highways and Traffic Working Group promoted by LCNs to enable support and advise on highway and traffic matters
- Promote self-help and localised enhanced highway maintenance works
- Options available to localities to enhance highway maintenance services which were outlined in letter dated February 2024 from the Service Director, Infrastructure and Transport

# Development of the Enhanced Highway Maintenance Pilot

Priority for Highways and Traffic Working Groups

Collaboration with ICT and Kier Transportation Ltd

Key considerations in developing the Pilot;

- Redesign of technical and financial business processes
- Communication
- Approval process
- Resource allocation and scheduling

## How it will work

- Parishes will register their interest in this scheme by requesting a meeting to discuss the activities they would like to be carried out by emailing [somersetehm@kier.co.uk](mailto:somersetehm@kier.co.uk).
- Kier's dedicated Community Engagement Manager will meet with the parishes and agree the works required and the time necessary to complete these works. If there is a need for additional materials etc this will be brought together into a bespoke price for each parish.
- Once the price is agreed between both parties, an invoice will be raised to the parish for payment and the works will be programmed in for completion.
- Kier's dedicated Community Engagement Manager will be a single point of contact to ensure that you have a person to speak with whenever you require it.

# Typical Services: Enhanced Routine Maintenance

## Enhanced Routine Maintenance Services

Pothole repairs

Localised grass cutting

Localised hedge cutting

Localised siding/ploughing on footways and carriageways

Localised 'grip' clearance

Single sign and/or post installation

Sign cleaning

Timber fencing repairs

Minor aesthetics works

Other minor civils

**Somerset**  
Council

# Typical Services: Specialist Services

Gully emptying

Surface water drainage jetting

Ditching

Drainage repairs

Road and / or footway lining (refresh)

Tree surgery

Minor masonry works

Traffic management for local events

# What is the cost? How is it priced?

The day rate costs consists of the following : -

- 2 Operatives
- 7.5 ton lorry.
- Small tools (spades, shovels, etc)
- Stihl saw
- Compaction plate
- Hedge cutter
- Strimmer
- Two way traffic lights

Day Rates		
Monday to Friday	Saturday	Sunday
£684.71	£778.41	£935.72

## Specialist Services

- Materials or specialist plant and equipment will be charged at actual cost plus fee.
- Specialist subcontract works (i.e. gully cleansing, re-surfacing etc) will be charged at actual cost plus fee.

Why do we charge a fee on additional works?

The fee charged covers : -

- Insurances
- Additional project management costs
- Overheads costs

## Depot locations

- Kier Transportation Yeovil Depot
- Kier Transportation Minehead Depot
- Kier Transportation Glastonbury Depot
- Kier Transportation Dunball Depot

## **What are gullies?**

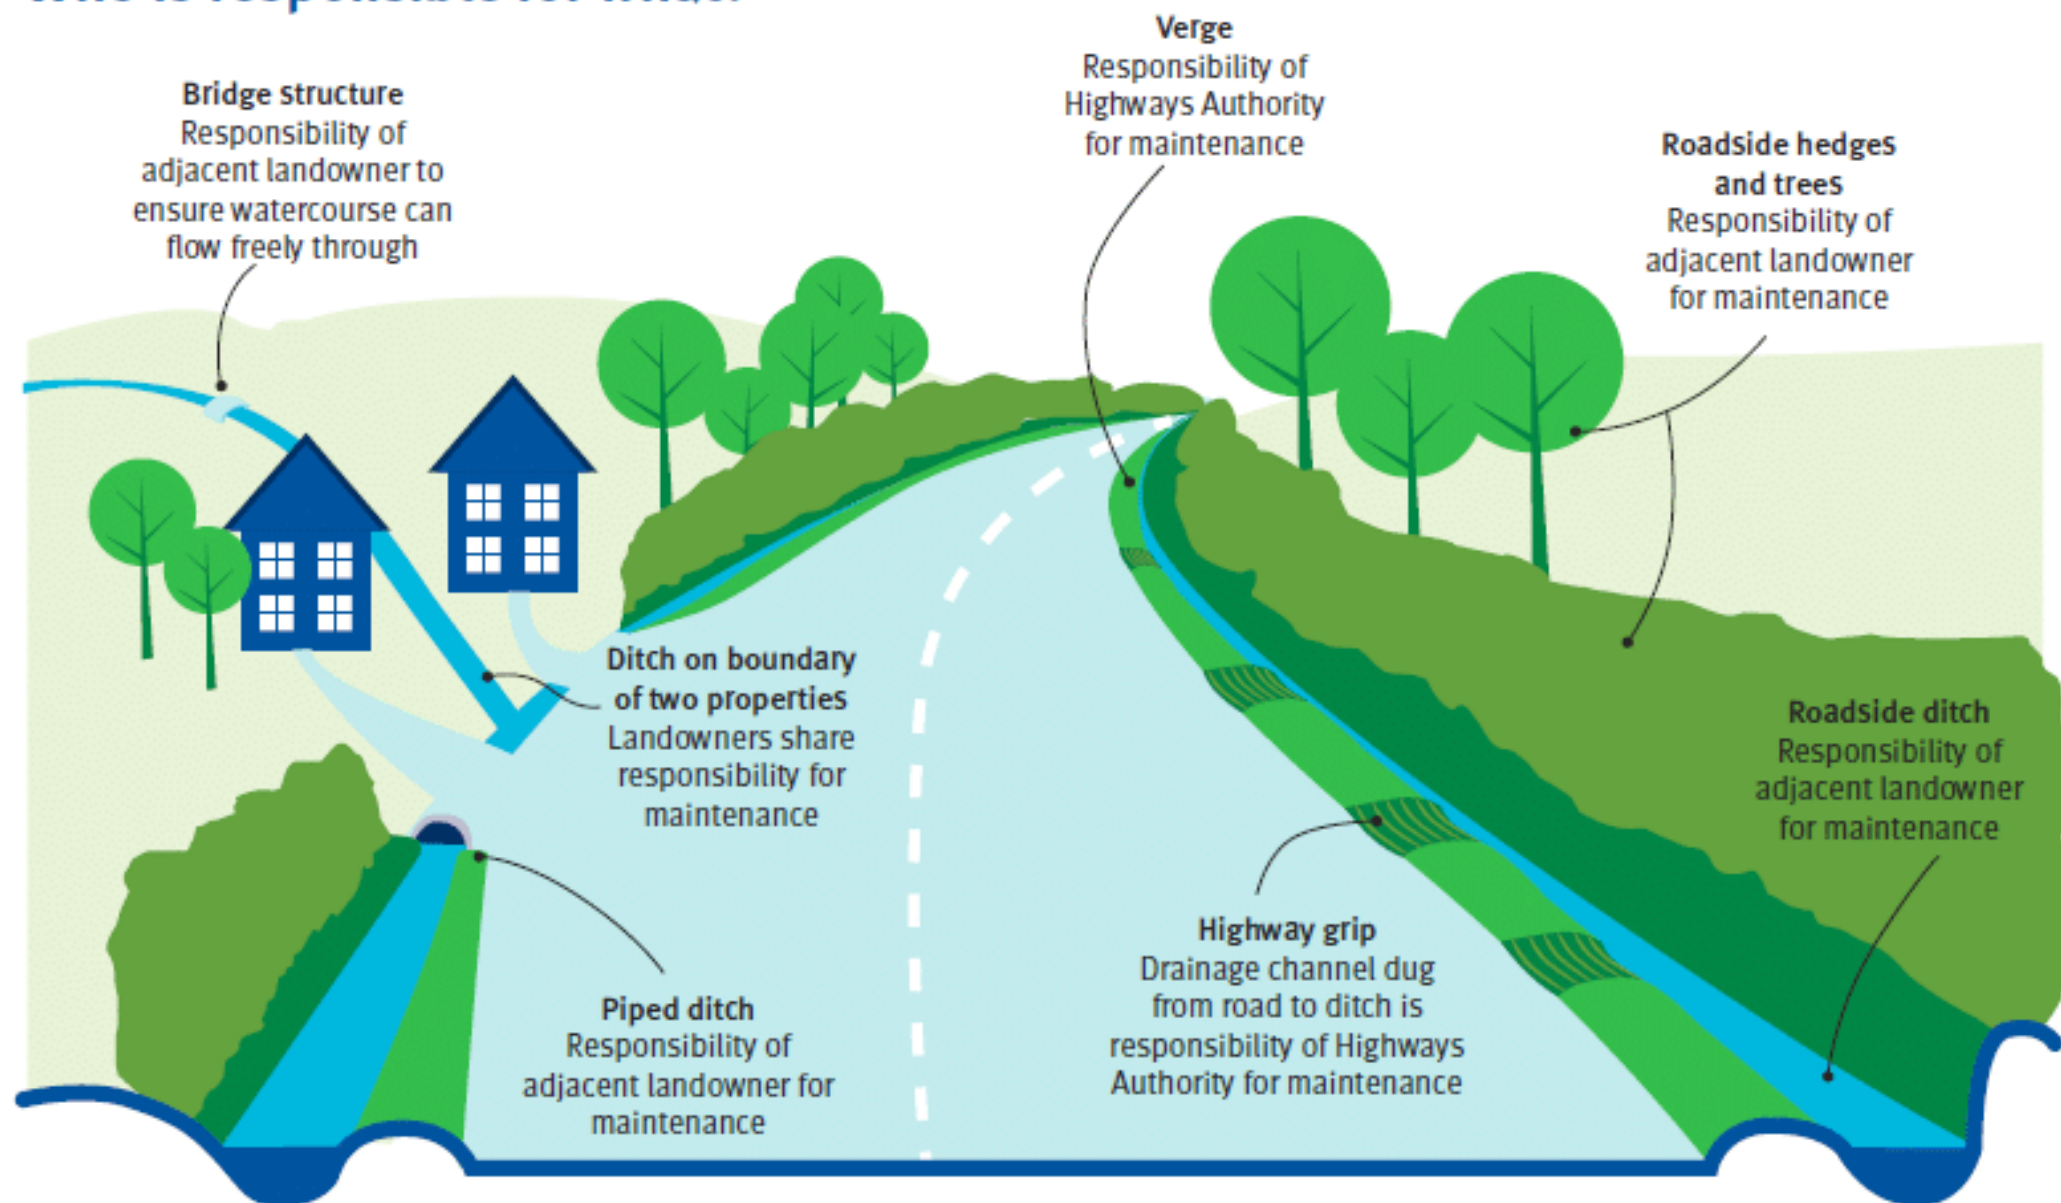

By definition, a gully (in the context of a drainage system) is a drainage fitting with an open top, a definite base and an outlet to one or more sides. Depending on the type of gully, they can be used to connect wastewater outlets or stormwater/rainwater outlets to suitable drains. They can also be used to drain surface water from areas susceptible to flooding.

## **Road drainage gullies**

Road gullies, as the name would suggest, are designed to discharge surface water from roads and highways, where often large volumes of surface water can build-up.

Road gullies are designed to be much more robust than domestic gullies, in order to withstand the heavier trafficked environments in which they are installed. These are most commonly made from concrete or HDPE.

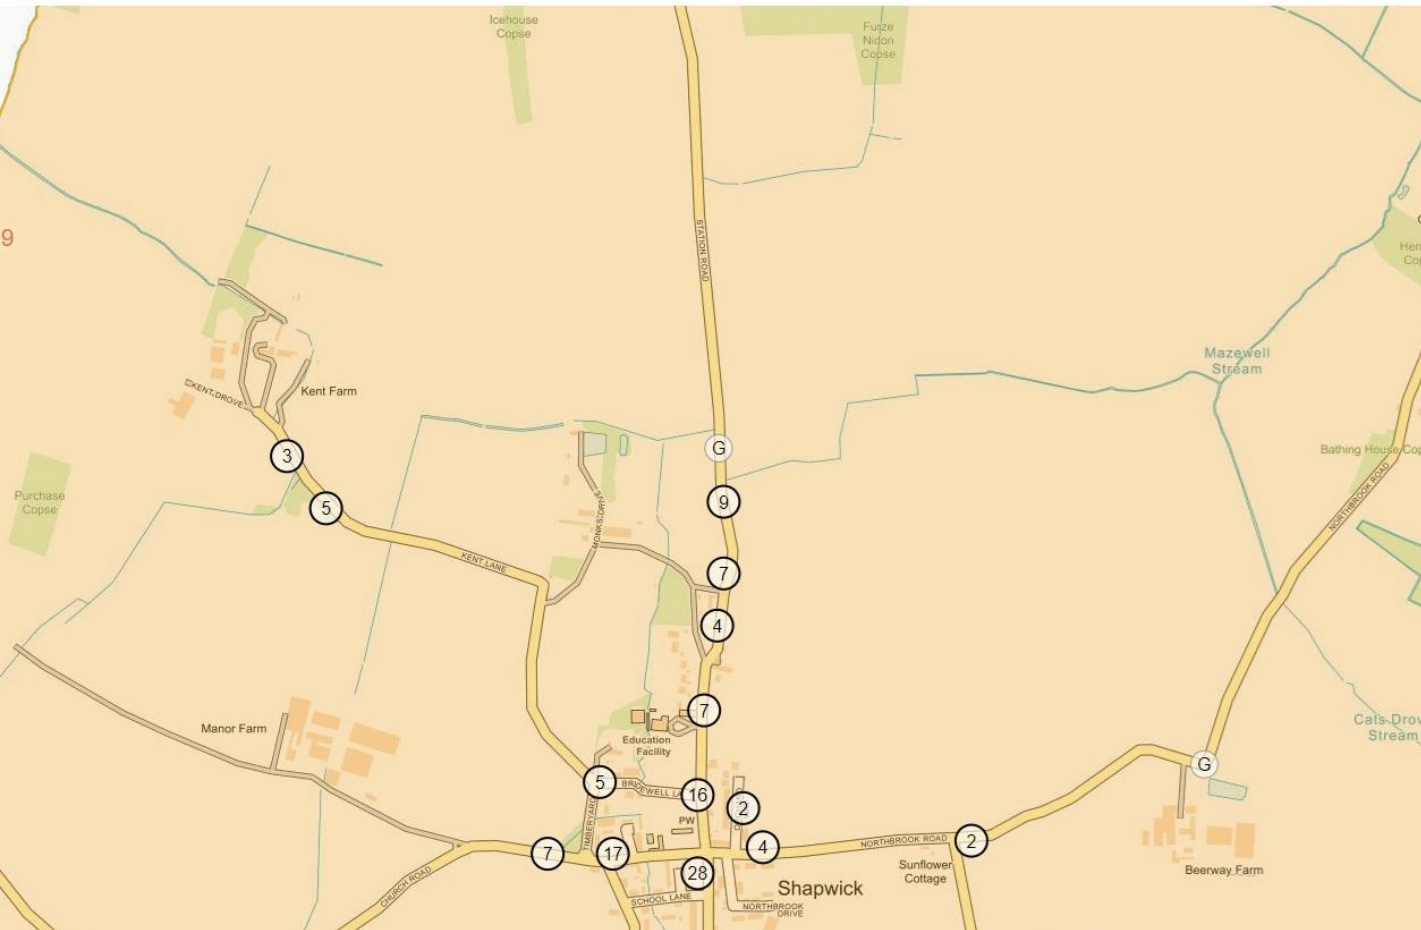

## Who is responsible for what?

## KaarbonTech Data

This map shows gullies in Shapwick

The number's correlates to how many gullies are in that area.
